EMPLOYMENT HISTORY

- **DevOps Engineer** – Advantor Systems [Promotion] (2022 – 2024)
- **Integration Technician** – Advantor Systems [Promotion] (2020 – 2022)
- **IT Assistant** – Advantor Systems (2018 – 2020)

PROFESSIONAL WORK EXPERIENCE

- **DevOps Engineer**
 - Worked on asset tracking mobile applications to collect and manage asset data in Salesforce.
 - Successfully integrated diverse applications to ensure seamless functionality with Salesforce.
- **Integration Technician**
 - Security equipment maintenance, repair, and programming for servers, video wall appliances, and communication devices.
 - Implemented Python-based automation to collect and organize Contract and Device information, significantly reducing turnaround time from several months to just a few weeks.
 - Implemented and optimized automation workflows to track device assets, manage Salesforce data using dataloader.io, and streamlined data organization processes.
 - Created Automation for device asset tracking (Power apps, Python), Salesforce data (dataloader.io), and data organization.
- **IT Assistant**
 - Provide technical support for hardware/software issues on location and via phone.
 - Created tracking documentation for computers, software, and back-up servers.
 - Constructed scripts to track and transfer employee computer information.
 - Conducted internal meetings to gather information from departments to develop apps.
 - Worked on group programming projects for C/Java applications, websites, and more.

PROJECTS

Online Multiplayer Video Game
(Used Godot Game Engine and Steam network API to sync players online)

Recipe Managing Web Application
(Data manipulation with python and web display with HTML/JavaScript)

AI Therapy App (Coding Competition)
(Utilizes AI to give unique responses depending on the user's questions)

(Available for viewing on https://weege5859.github.io/Portoflio_Joshua_Marshall/)

Contract Data Manipulation Script
(Used Python for web display and data entry, and pandas for file manipulation)

Shipment Management Script
(Used PyQt for App display and python/pandas for data retrieval/entry)

Realtime Updating Dashboard
(Utilizes Flask/HTML for Web display, and data collection with python)

SKILLS

Proficient: Godot, Python (Flask, Django, Pandas, PyQt), Networking, SQL (MySQL), JavaScript, HTML, CSS, PHP, Java, C#, C++, , Power Apps, React, AWS

Methodologies: Object Oriented Programming, Data Structures and Algorithms, Git Control

EDUCATION
