EMPLOYMENT HISTORY

- ***Configuration and Automation Management Specialist*** *– Advantor Systems [Promotion] (2022 – 2024)*
- ***Integration Technician*** *– Advantor Systems [Promotion] (2020 – 2022)*
- ***IT Assistant*** *– Advantor Systems (2018 – 2020)*

PROFESSIONAL WORK EXPERIENCE

- ***Configuration and Automation Management Specialist***
  - Worked on asset tracking mobile applications to collect and manage asset data in Salesforce.
  - Successfully integrated diverse applications to ensure seamless functionality with Salesforce.
- ***Integration Technician***
  - Security equipment maintenance, repair, and programming for servers, video wall appliances, and communication devices.
  - Implemented Python-based automation to collect and organize Contract and Device information, significantly reducing turnaround time from several months to just a few weeks.
  - Implemented and optimized automation workflows to track device assets, manage Salesforce data using dataloader.io, and streamlined data organization processes.
  - Created Automation for device asset tracking (Power apps, Python), Salesforce data (dataloader.io), and data organization.
- ***IT Assistant***
  - Provide technical support for hardware/software issues on location and via phone.
  - Created tracking documentation for computers, software, and back-up servers.
  - Constructed scripts to track and transfer employee computer information.
  - Conducted internal meetings to gather information from departments to develop apps.
  - Worked on group programming projects for *C/Java* applications, websites, and more.

PROJECTS
